

DOGS & CATS IMPORT REQUIREMENTS - TURKEY

1)Microchip

First, your pet must be microchipped with an ISO 11784/11785 pet microchip that has 15 digits.

2)Vaccinations

Your pet must be vaccinated against rabies. Your pet must be a minimum of 12 weeks old before it can be vaccinated against rabies and no sooner than 30 days, no later than 12 months of entry.

3)Rabies Titer Test(Rabies Serology Test Report)

A Rabies Titer Test-Blood Test (RNATT-Rabies Serology Test Report) is required. Blood sample must be taken minimum 21 days after the last rabies vaccination. (The day of vaccination does not count in the 21 days, it is the day after vaccination when the 21 days begins.)

After the blood test, no need to waiting period. If the rabies vaccine chain has not been broken, the blood test remains valid. Blood test must be provided by internationally certificated laboratories, otherwise provided blood test is refused. You can find internationally certificated laboratories below link;

https://ec.europa.eu/food/animals/pet-movement/approved-labs_en

4)Health Certificate

The Veterinary Certificate for Turkey must be completed within 48 hours before the departure and it must be stamped (endorsed) by the government of the exporting country responsible for the import and export of animals.

5)Other Important Rules

- ✚ Owner must be flying with pet(s) on the same flight.
- ✚ Per person is allowed for 2 pets only.
- ✚ All documents must be prepared to actual consignee's name.
- ✚ During the clearance the owner must present at airport with his / her original passport.
- ✚ Clearance takes around 3 - 4 hours minimum and same day clearance depends on aircraft's schedule. Week-end clearance is not possible.
